SCALE

HOP BROOK WILDLIFE MANAGEMENT AREA

(Lee/Tyringham)

SIZE: 415 acres of flat, valley bottomland.
U.S.G.S. Quads: Stockbridge, East Lee

VEGETATION: Most of the habitat is seasonally flooded meadowland with attendant alder and willow shrub swamps. The northwestern portion of the area supports a seasonally flooded wooded swamp along the Housatonic River floodplain.

WATER: Segments of Hop Brook, the Mad River and the Housatonic River are located within the area. Hop Brook is stocked trout water.

WILDLIFE: Stocked pheasant, aquatic furbearers, raccoon, woodcock, waterfowl, deer, coyote and numerous nongame species.

**SPECIAL
REGULATIONS:** Note that a "hunter orange" hat is required wear for hunters during the pheasant season.
